Microorganism **WANTED** Poster Guide

There's a new villain in town and it is up to you to inform the public of its possible dangers.

You will create a **WANTED** poster to warn the people of this enemy and capture this varmint DEAD or ALIVE!

You have several choices as the focus for your poster:

1. Bacteria:

- Streptococcal
- Escherichia coli
- Salmonella
- Staphylococcus aureus
- Bacillus anthracis

2. Virus:

- Varicella zoster
- Ebola
- Influenza
- Human Immunodeficiency Virus
- Variola

3. Parasite:

- Anoplocephala perfoliata
- Plasmodium falciparum
- Sarcoptes scabiei

4. Fungi:

- Tinea pedis
- Candida albicans
- Tinea corporis

➤ My WANTED poster enemy is:

Your poster must contain the following information:

(Hint: Number them 1-8 on your poster so you don't miss any!)

0. COLOR (markers, colored pencils, crayons, etc.)

1. ENEMY NAMES:

1a. Scientific name:

1b. Common name (aka "Alias"):

2. PICTURE (can be drawn or printed from the internet):

3. MICROORGANISM CATEGORY (Bacteria, Virus, Parasite, Fungus):

4. DISEASE DETAILS: (How do you get it? What are the symptoms/effects? Deadly?)

5. LAST SEEN (Where it "hangs out"?)

5a. Geographically (where in the world):

5b. Anatomically (where in the body):

6. IF SEEN (aka Weaknesses) (Can we treat the disease? If yes, how?):

7. INTERESTING FACTS (1 or more):

8. EYEWITNESSES (Write your sources (2-3) on **back** of your poster):
